Dear All,

I really enjoy sending you this newsletter and informing you that Calypso benefits now from a completely new website. Opened on December 16th, its main goals are to support the development of Calypso, by answering to the needs of those who want to know more about Calypso and those who require assistance to implement it. This new site is also a place to exchange for all the members of the Calypso community. A part is dedicated to the CNA members for their cooperation in the working groups. Of course, some other functions will be added in the next months to better answer to your needs, whether you are yet user of Calypso or not, whether you are an operator, an authority, a manufacturer or a consultant.

I wish you a good visit of the new Calypso website: http://www.calypsonet-asso.org/

Philippes Vayron
CNA Chairman

Calypso is the contactless electronic ticketing standard designed by users for users

Ten reasons to choose Calypso:

Calypso Open Session, the 5th of November 2014

Year after year, the Calypso open session is the yearly event which regroups all the Calypso community for a nice evening. Once again, the 2014 open session was a real success, with more than 100 participants gathered on the Melody Blues pier on the Seine River. It was a great opportunity for informal exchanges and to learn more about the development of Calypso and the main orientations that CNA will undertake for the next years.

The 2nd Calypso Awards Ceremony took place on the 5th of November, on the occasion of the CNA Open Session. And the winner are ...

Best Customer Value

The winner of the category Best Customer Value was Compagnie des Transports Strasbourgeois' UGO. UGO represents a new way of ticketing in Strasbourg. This application is available for Android NFC mobile phones and allows users to benefit from all the advantages of magnetic tickets and smartcards.

Best Innovation

The winner of the category Best Innovation was CARD4B SYSTEMS S.A., with its project VIVA Parking & VIVA Portal. The project consists in the seamless usage of interoperability mechanisms implemented in the VIVA interoperable public transport system of the Lorraine region and in the EMMEL car parks.
